

## Agenda

- Warping to Mapping
- Seam Carving

2

קורס גרפיקה ממוחשבת  
2008 סמסטר ב'

## Image Processing II

חלק מהשקפים מעובדים משקפים של פרדו דוראנד, טומס פנקהאוסר ודינאל כהן-אור

## Example Mappings

- Scale by factor:
  - $x = factor * u$
  - $y = factor * v$

## Mapping

- Last time we started to discuss warping and mapping
- In general, we define a transformation
  - Destination  $(x,y)$  for every source  $(u,v)$

3

## Example Mappings

- Shear in X by factor:

- $x = u + factor * v$
- $y = v$

- Shear in Y by factor:

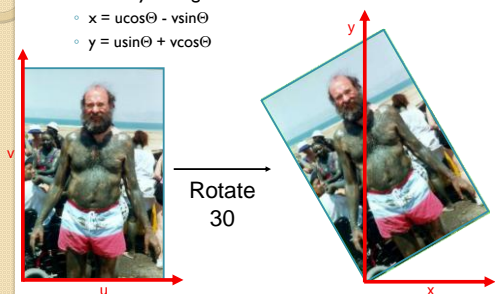

- $x = u$
- $y = v + factor * u$

## Example Mappings

- Rotate by  $\Theta$  degrees:

- $x = u \cos \Theta - v \sin \Theta$
- $y = u \sin \Theta + v \cos \Theta$

## Point Correspondence

- Another way to define mapping is by correspondences
  - $A \leftrightarrow A'$
  - $B \leftrightarrow B'$
  - $C \leftrightarrow C'$

8

## Other Mappings

- Any function of  $u$  and  $v$ :
  - $x = f_x(u,v)$
  - $y = f_y(u,v)$

Fish-eye

"Swirl"

"Rain"

## Point Correspondence

- How to compute  $P'$

$$P' = w_A A + w_B B + w_C C$$

10

## Point Correspondence

- Another way to define mapping is by correspondences
  - $A \leftrightarrow A'$
  - $B \leftrightarrow B'$
  - $C \leftrightarrow C'$

9

## Possible application: Morphing

- User specifies corresponding points
- Blend while warping

12

## Point Correspondence

- How to compute  $P'$

$$P' = w_A A + w_B B + w_C C$$

Barycentric Coordinates

## Finding the Seam?

(c) ariel shamir

## Seam Carving

(c) ariel shamir

### Dynamic Programming

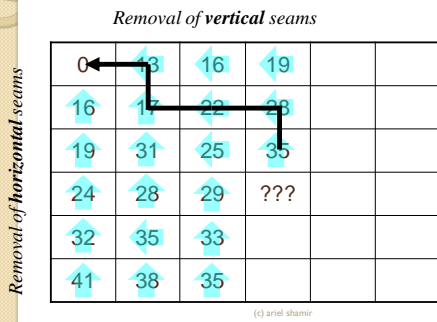

### Finding the Optimal Seam

$$s^* = \arg \min_s E(s)$$

### Optimal Order Map

### Dynamic Programming

### Aspect Ratio Change

### A Local Operator!

### Aspect Ratio Change

(c) ariel shamir

### Aspect Ratio Change

(c) ariel shamir

### Energy Preservation

While resizing: remove **as many** low energy pixels and **as few** high energy pixels!

(c) ariel shamir

### Different Energy Functions

- Histogram of Gradient
- Entropy
- $E_1$
- Mean shift &  $E_1$

(c) ariel shamir

### Reduce Width

(c) ariel shamir

### Energy Preservation

If we measure the average energy of pixels in the image after applying a resizing operator...

...the average should increase!

While resizing: remove **as many** low energy pixels and **as few** high energy pixels!

(c) ariel shamir

## Exercise #1 – Image retargeting

- See definition on course website
- Submission: on 18/6/2008
- **Headsup:**
  - Exercise #2 will be published 11/6/2008 (week overlap)
  - Exercise #3 will be published (I hope) beginning of July
